

LC, L2 & L3 Sidewall Propeller Fans

Belt Drive - Exhaust & Supply

Catalog L01-July 2007

The World's Leading Producer of
Air Movement Products

Soler & Palau USA, Div. of Soler & Palau Ventilation Group, certifies that the models shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Soler&Palau  Ventilation Group

COMMERCIAL PRODUCT LINE

Model LC - Construction Level I

Application

Model LCE (exhaust) and LCS (supply) are high capacity belt driven propeller fans rated from 3,000 to 40,000 cfm to .625" w.g. static pressure. Their primary application is the exhaust or supply of large volumes of air at relatively low static pressures from commercial, light industrial and agricultural buildings such as manufacturing and assembly plants, warehouses, parking garages, gymnasiums, equipment rooms, distribution centers, poultry and greenhouses.

Wall mounting provides an easy, economical installation. Belt driven fans provide large volumes of air at low fan speeds and low noise levels and afford quick, easy performance adjustments. All necessary accessories are available to meet any need or specification.

When suspended from the ceiling, thus keeping floor spaces open, model LC can be installed to direct large volumes of air downward toward work centers improving employee comfort and productivity.

When mounted in portable housings with OSHA guards, Model LC-P can be used as a mancooler and rolled to hot spots to provide needed employee relief from heat or fumes and help increase productivity.

Also see Model L with construction levels 2 and 3 for higher static pressure performances and heavier construction designs. (Pages 3 and 4.)

Construction/Specification Checklist

Belt Drive, Wall Exhaust (or Supply) Propeller Fan shall be provided as follows:

CERTIFICATIONS: Fans shall be AMCA Licensed for air and sound performance. Fans shall be UL and CUL 705 listed for electrical safety and reliability (Optional).

PANEL ASSEMBLY: Panels shall be heavy-gauge G90 galvanized (optional aluminum) with spun one piece venturi. Motor and bearing plate shall be a minimum of 12 gauge galvanized steel except size 20. Panel end support frame assembly shall be of welded, not bolted, construction with prepunched mounting holes for easy installation.

PROPELLER: Blades shall be die formed galvanized G90 steel of minimum 16 gauge. Blades shall be bolted to an epoxy coated hub which is keyed to the fan shaft. Propeller assembly shall be statically balanced.

DRIVES: All sheaves shall be sized to a minimum 150% of driven horsepower, machined cast iron adjustable pitch through 3 horsepower, keyed to both the motor and fan shaft. Fan shaft shall be precision turned, ground and polished steel. Belts shall be nonstatic oil and heat resistant V-belts.

BEARINGS: All bearings shall be self-aligning cast iron pillow block type with relube fitting and of the air handling design. Bearing design shall be for a minimum of L-50 200,000 hour average life.

MOTORS: Permanently sealed ball bearing type furnished to the specified voltage, phase and enclosure. All motors shall be mounted and factory run tested.

Motor Service Factor

Motor service factors are utilized in some performance selections shown. This is a safe and common industry practice that provides more performance for the investment. BHP is shown at the maximum catalog performance point. BHP at all other static pressures listed is less than that shown, in most cases substantially less. Because the motors are in the air stream there are no negative effects on motor life. 2 speed motor applications are recommended at or below their nominal BHP levels. If desired, pick the next higher horsepower to eliminate this service factor usage. Refer to the Optimizer Fan Selection Program for actual BHP at any performance point.

Optimizer Selection Program

Please refer to Soler & Palau's Optimizer Program for fan curve, submittal information and other details of this series and other Soler & Palau products. Contact your representative or factory for a copy. Visit Soler & Palau's website for additional information: www.solerpalaucanada.com.

Quickship Program

Most models and many optional accessories are available on the Quickship Program. This provides rapid delivery of standard products so that tight project deadlines can be met and downtime on replacement work can be held to a minimum. Delivery options includes next day, 3 day and 10 day shipment. See the Quickship Catalog for details.

- Motorside Guard
- Frontside Guard
- Rainhood
- Damper Guard
- Paint Finishes
- Electrical Accessories

Standard 705 (Optional)

All specifications are subject to change without notice unless approved in submittal by Soler & Palau.

Applications:

Models LE (exhaust) and LS (supply) are high capacity wall mounted belt driven propeller fans rated from 5000 to 47,000 CFM and to 1.0" w.g. static pressure. Their primary application is the exhaust of large volumes of ventilation air from commercial and light industrial buildings such as manufacturing and assembly plants, warehouses, parking garages, gymnasiums, equipment rooms, distribution centers and OEM applications.

Wall mounting provides an easy and economical installation. All necessary accessories are available. Belt driven fans provide large volumes of air at low fan speed and low noise levels and afford quick, easy performance adjustments.

See Model L - Construction level 3 for higher static pressures and heavier construction designs or models LC for your lighter duty ventilation requirements (see pages 2 and 4).

Construction/Specification Checklist

Belt Drive, Wall Exhaust (or Supply) Propeller Fan shall be provided as follows:

CERTIFICATIONS: Fans shall be AMCA Licensed for air and sound performance. Fans shall be UL and cUL 705 listed for electrical safety and reliability (Optional).

PANEL ASSEMBLY: Panels shall be heavy-gauge G90 galvanized (optional aluminum) with spun one piece venturi. Motor and bearing plate shall be a minimum of 10 gauge G90 galvanized steel. Panel end support frame assembly shall be of welded, not bolted, construction with pre-punched mounting holes for easy installation.

PROPELLER: Propellers shall be six-bladed, die-formed, minimum 16 gauge, G90 galvanized steel bolted to a welded, structural steel hub plate and keyed to the fan shaft. Blades shall incorporate multiple laminations for 3 horsepower motors and larger. Propeller assembly shall be statically balanced.

MODEL L2 - Level 2 Construction

Fan Size	Material (Ga. or inches th.)							Max Shaft Diameter (in.)	Max Motor Frame Size	Avg. Weight (lbs.)
	Fan Panel	Drive Frame	Motor & Bearing Supports		Propeller					
			Galv	Alum	Spider	Blade				
						Steel	Steel			
24	18	10	10	1/4	1/4	16	.080	1	182T	180
30	16	10	10	1/4	1/4	16	.080	1	182T	180
36	16	10	10	1/4	1/4	16	.080	1 3/16	184T	215
42	16	10	10	1/4	3/8	16	.080	1 3/16	184T	235
48	16	10	10	1/4	3/8	16	.080	1 3/16	184T	300
54	14	10	10	1/4	3/8	16	.080	1 3/16	184T	400
60	14	10	10	1/4	3/8	16	.080	1 3/16	184T	490

DRIVES: All sheaves shall be sized to a minimum 150% of driven horsepower, machined cast iron adjustable pitch (through 3HP), keyed to both the motor and fan shaft. Fan shaft shall be precision turned, ground and polished steel. Belts shall be nonstatic oil and heat resistant V-belts.

BEARINGS: All bearings shall be self-aligning cast iron pillow block type with relube fitting and of the air handling design. Bearing design shall be for a minimum of L-50 200,000 hour average life.

MOTORS: Permanently sealed ball bearing type furnished to the specified voltage, phase and enclosure. All motors shall be mounted and factory run tested.

Motor Service Factor

Motor service factors are utilized in some performance selections shown. This is a safe and common industry practice that provides more performance for the investment. BHP is shown at the maximum catalog performance point. BHP at all other static pressures listed is less than that shown, in most cases substantially less. Because the motors are in the air stream there are no negative effects on motor life. Explosion proof and 2 speed motor applications are recommended at or below their nominal BHP levels. If desired, pick the next higher horsepower to eliminate this service factor usage. Refer to the Optimizer Fan Selection Program for actual BHP at any performance point.

Quickship Program

Most models and many optional accessories are available on the Quickship Program. This provides rapid delivery of standard products so that tight project deadlines can be met and downtime on replacement work can be held to a minimum. Delivery options includes: 2, 5 and 10 day shipments.

Optimizer Fan Selection Program

Please refer to Soler & Palau Optimizer Program for fan curve, submittal information and other details of this series and other Soler & Palau products. Contact your representative or factory for a copy. Log onto Soler & Palau's web site for additional information at: www.solerpalaucanada.com.

Optional Accessories

- Wall Housing
- Wall Collar
- Dampers
- Mounting Flanges
- Motorside Guard
- Frontside Guard
- Rainhood
- Damper Guard
- Paint Finishes
- Electrical Accessories

Standard 705
(Optional)

All specifications are subject to change without notice unless approved in submittal by Soler & Palau.

Model L3 - Construction Level 3

Applications:

Models LE (exhaust) and LS (supply) are high capacity wall mounted belt driven propeller fans rated from 35,000 to 85,000 and to 1.0" w.g. static pressure. Their primary application is the exhaust of large volumes of air at relatively moderate static pressure from commercial, industrial and agricultural buildings such as manufacturing and assembly plants, warehouses, foundries, mills, boiler rooms and equipment rooms.

Wall mounting provides an easy and economical installation. Belt driven fans provide large volumes of air at low fan speed and low noise levels and afford quick, easy performance adjustments. All required accessories are available with Model L.

See Models LC and L - level 2 construction, for lower static pressures and lighter duty requirements which are generally more economical. (Pages 2 and 3)

Construction/Specification Checklist

Belt Drive, Wall Exhaust (or Supply) Propeller Fan shall be provided as follows:

CERTIFICATIONS: Fans shall be AMCA Licensed for air and sound performance. Fans shall be UL and CUL 705 listed for electrical safety and reliability (optional).

PANEL ASSEMBLY: Panels shall be heavy-gauge G-90 galvanized (optional aluminum) with spun one piece venturi. Motor and bearing plate shall be a minimum of 10 gauge G90 galvanized steel structurally secured to minimum 1.25 inch schedule 40 galvanized steel pipe by means of 12 gauge galvanized steel pipe brackets. Panel end support frame assembly shall be of welded, not bolted, construction with pre-punched mounting holes for easy installation.

PROPELLER: Propellers shall be six-bladed, die-formed, minimum 16 gauge, G90 galvanized steel with double 16 gauge laminations bolted to a welded, structural steel hub plate and keyed to the fan shaft. Fan shaft shall be precision turned, ground and polished steel. Props shall be statically balanced.

MODEL L3 - Level 3 Construction

Fan Size	Material (Ga. or inches th.)						Max Shaft Diameter (in.)	Max Motor Frame Size	Avg. Weight (lbs.)

SOLER & PALAU USA LIMITED WARRANTY

Soler & Palau USA (manufacturer), 6393 Powers Avenue, Jacksonville, Florida 32217, warrants equipment of its manufacture to be free from defects in design, materials and workmanship (exclusive of abrasion, corrosion or erosion) for one (1) year from the date of shipment to the original purchaser or the date of notification of readiness to ship. Motor warranty is one (1) year. In order to claim the benefit of this warranty, buyer must notify manufacturer in writing of the claimed defect within ten (10) days after discovering it and return this equipment or parts to the factory with transportation prepaid. In the event of on-site repair, no service technician will be dispatched until manufacturer receives your written purchase order. If any of the following conditions exist, the warranty will be null and void: **(1)** Buyer has permitted other persons not approved or authorized by manufacturer to alter, adjust, replace or repair the equipment or any part thereof. **(2)** Buyer has not followed instructions or other directions given in the contract documents or our maintenance manual. **(3)** When breakage or other loss or damage is the result of any negligence, misuse or fault on the part of any operator or other person not under our supervision or control. **(4)** The defect is the result of designs or drawings made, furnished or specified by others. **(5)** In the case of goods not manufactured but supplied by the manufacturer as part of a contract, manufacturer shall only be liable to the same extent that our supplier is to manufacturer, not to exceed any liability manufacturer would have for warranty on our own equipment. **(6)** Buyer has not paid in full any invoices submitted to buyer which are due for payment. **(7)** Unusual wear and tear of the equipment. Statements relating to the product, its use or installation made prior to the execution of the agreement, are not warranties except to the extent that the contrary is expressly set forth herein. It is understood that such statements were not intended to, and did not, form a part of the agreement; they were merely made in the course of negotiations of the parties. **THIS WARRANTY IS IN LIEU OF ANY OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. OUR SOLE AND EXCLUSIVE OBLIGATION UNDER THIS WARRANTY IS TO REPAIR OR REPLACE DEFECTIVE EQUIPMENT OR PARTS OR, AT OUR OPTION, TO PAY THE REASONABLE COST OF REPAIR OR REPLACEMENT. BUYER AGREES THAT NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES, DAMAGES FOR LOST PROFITS OR SALES, OR DAMAGES FOR INJURIES TO PERSON OR PROPERTY) SHALL BE AVAILABLE. NOTWITHSTANDING THE ABOVE, THE TOTAL AMOUNT THAT MAY IN ANY EVENT BE PAYABLE IN SETTLEMENT OF LIABILITY, HOWEVER INCURRED, SHALL NOT EXCEED THE CONTRACT PRICE.**

Pressure Loss Guide for Accessories

Use the estimated pressure drop graphs to help select the proper exhaust or supply fan package that will deliver the desired airflow. Enter the graph from the bottom at the specified CFM and move vertically upward to the fan curve for the desired fan size, then horizontally to the left and read the estimated static pressure drop resulting from these typical accessory packages. Add the accessory pressure loss to the system (or building) design static pressure loss to obtain the total static pressure loss to be used for the proper fan selection.

Exhaust Airflow
with Wall Housing
Gravity Damper
Rainhood
Motorside Guard

Supply Airflow
with Wall Housing
Gravity Damper
Rainhood
Motorside Guard

Standard Mounting Arrangements

Wall housing flush with outside wall

Wall housing centered within wall

Wall housing flush with inside wall

NOTE: Supply applications have the fan venturi spun on the opposite side of the fans shown above. The fans shown are exhaust. Rainhoods are required on supply applications and recommended on exhaust applications where additional weather protection is desired. Exhaust and/or supply fans installed as shown should be serviced from the interior of the building. Where service is required from the exterior of the building, consult the factory or representative for recommendations. All bracing shown is field provided. Field flashing and caulking of wall housing seams and unused mounting holes, will ensure a weather resistant installation.

Performance ratings do not include the effects of appurtenances (accessories).

Power ratings (BHP) do not include transmission losses.

Performance certified is for installation type A-free inlet, free outlet.

The sound ratings shown are loudness values in fan sones @ 5' (1.5m) in a hemispherical free field calculated per AMCA Standard 301.

Values shown are for installation Type A-Free inlet fan sone levels.

Due to air stream cooling, the motor loading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown - in many cases substantially less. Use Optimizer to see the exact BHP for your selection.

Soler & Palau USA, Div. of Soler & Palau Ventilation Group, certifies that the models shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Performance ratings do not include the effects of appurtenances (accessories).

Power ratings (BHP) do not include transmission losses.

Performance certified is for installation type A-free inlet, free outlet.

The sound ratings shown are loudness values in fan sones @ 5' (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type A-Free inlet fan sone levels.

Due to air stream cooling, the motor loading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown - in many cases substantially less. Use Optimizer to see the exact BHP for your selection.

Model LC and Model L2 Size 30

Soler & Palau USA, Div. of Soler & Palau Ventilation Group, certifies that the models shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Performance ratings do not include the effects of appurtenances (accessories).

Power ratings (BHP) do not include transmission losses.

Performance certified is for installation type A-free inlet, free outlet.

The sound ratings shown are loudness values in fan sones @ 5' (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type A-Free inlet fan sone levels.

Due to air stream cooling, the motor loading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown - in many cases substantially less. Use Optimizer to see the exact BHP for your selection.

Performance ratings do not include the effects of appurtenances (accessories).

Power ratings (BHP) do not include transmission losses.

Performance certified is for installation type A-free inlet, free outlet.

The sound ratings shown are loudness values in fan sones @ 5' (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type A-Free inlet fan sone levels.

Due to air stream cooling, the motor loading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown - in many cases substantially less. Use Optimizer to see the exact BHP for your selection.

Model L3

Size 72

Soler & Palau USA, Div. of Soler & Palau Ventilation Group, certifies that the models shown herein are licensed to bear the AMCA Seal. The ratings shown are based on test and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirement of the AMCA Certified Ratings Program.

Wall Collar and Optional Accessories

Wall Collar

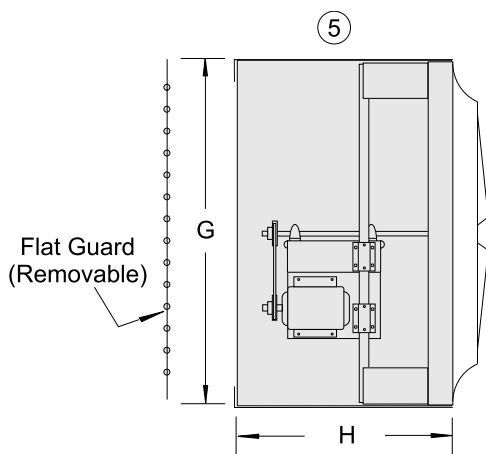

The heavy-gauge, all G-90 galvanized mounting collar provides a simple solution to installing a fan in a rough wall opening when a rear safety guard is **NOT** required. A front wire guard, shutter, and/or rainhood can be attached to the front prepunched flanges. The wall collar can be used in exhaust or supply applications for all fan sizes. The wall collar is mounted with the fan on the interior side of the building. All collars ship fully assembled with the fan to lessen jobsite installation costs. We strongly recommend rainhoods and motorized shutter for all supply applications as well as for exhaust applications where additional weather protection is desired.

Accessories Dimensions

Fan Size	Wall Collar ①		Minimum Wall Opening	Flat Guard ②	Damper ③		Rainhood ④	Motorside Guard ⑤	
	A	B	Sq	C	D (O.D)	E	F	G Exh/Sup	H Exhaust/Supply

24	30 1/4	21	31 1/2	30	28 1/2	26	28 1/2	30	34
30	36 1/4	21	37 1/2	36	34 1/2	32	34 1/2	36	34
36	42 1/4	21	43 1/2	42	40 1/2	38	40 1/2	42	34
42	48 1/8	21	49 1/2	48	46 1/2	44	46 1/2	48	34
48	54 1/8	21	55 1/2	54	52 1/2	50	49 1/2	54	34
54	60 1/8	21	61 1/2	60	58 1/2	56	58 1/2	60	34
60	66 1/8	21	67 1/2	66	64 1/2	62	64 1/2	66	34
72	80 1/8	26	81 1/2	80	78 1/2	76	73	80	34

(a) Level 3 Construction requires a deeper motorside guard as shown. Unless shown otherwise supply and exhaust dimensions are similar.

Sheet Metal and Wire Motorside Guard

An assembled heavy-gauge G-90 galvanized steel housing is available with front or rear OSHA approved flat wire safety guard with 1/2 x 1 in. galvanized welded wire. This housing and guard attaches to the fan panel. It ships pre-assembled to lessen installation costs, but is available knocked-down for field assembly. Optional heavy-duty OSHA approved guard is constructed of heavy-gauge aluminum expanded metal. Please note that this style guard is not compatible with the wall collar or wall housing. Adequate clearance must be maintained between fan blade and damper.

Wall Housing and Optional Accessories

WALL HOUSING

This heavy-gauge, all galvanized G-90 steel housing provides a simple solution to installing a fan and all required accessories in a rough wall opening. It can be used in exhaust or supply applications and in fan sizes 20 through 72 inch. Depending on space and maintenance requirements, the wall housing may be installed inward or outwards of the building. All housings ship assembled with the fan to lessen job site installation costs. Wire guards, shutters and/or rainhoods may be attached to the pre-punched flange. See pages 16-19 for available accessories. We strongly recommend rainhoods and motorized shutters for all supply applications and whenever additional weather protection is desired..

Fan Size	Wall Housing ①					Minimum Wall Opening (Sq)	Flat Guard ② C (Sq)	Damper ③		Rainhood ④ F
	A (Sq.) O.D.	B Length						D (O.D)	E	
		Exhaust		Supply

60	67	44	44	44	44	67 1/2	66	64 1/2	62	64 1/2
72	81	NA	44	NA	44	81 1/2	80	78 1/2	76	73

Note (1) - 44" long wall housing required when optional motorized damper is selected.

Rainhood recommended for supply applications.

SIDEWALL PROPELLER FAN ACCESSORIES & OPTIONS

Heavy-Duty Galvanized Exhaust Motorized Shutter: This damper has a flanged frame and is designed to fit the inside flanges of the optional wall housing or wall mounting collar. The frame and blades are constructed of galvanized steel and are rated to 3000 FPM with proper clearance as provided by all factory accessories. The damper body recesses into the opening for a flush appearance. See page 19 for more details on the electric damper operators.

Standard Duty Aluminum Exhaust Gravity Shutter: This damper can greatly reduce the infiltration of outside air and although not completely watertight, will provide weather protection in an economical fashion. Constructed with a galvanized frame and aluminum blades this damper is rated to 2000 FPM with the proper clearance as provided by all factory accessories. The damper body is recessed into the opening for a flush appearance.

Heavy-Duty Galvanized Supply Motorized Shutter: The motorized option improves weather protection by providing a tighter closure seal and is recommended for all supply applications. Heavy-duty dampers are constructed with galvanized frames and blades and are rated to 3000 FPM. The damper body is not recessed providing extra clearance between the fan and damper blades. See page 19 for more details on the electric damper operators.

Standard Duty Aluminum Supply Motorized Shutter: The motorized option improves weather protection by providing a tighter closure seal and is recommended for all supply applications. Standard duty dampers are constructed with galvanized frames and aluminum blades and are rated to 2000 FPM. The damper body is not recessed providing extra clearance between the fan and damper blades. See page 19 for more details on the electric damper operators.

Center Pivot Motorized Damper - Supply or Exhaust: The flanged frame damper is designed to recess inside the flanges of the optional wall housing or wall mounting collar. The center pivot style damper provides superior weather resistance. Galvanized (optional aluminum) construction is rated to 3500 FPM with proper clearance as provided by all factory accessories. See page 19 for more details on the electric damper operators.

Rainhoods or Weatherhoods: Designed to provide additional weather protection by partially shielding the wall opening and should be used for all supply applications and whenever additional weather resistance is desired. The galvanized (aluminum optional) hood attaches to the wall housing or wall collar flanges. Field flashing and caulking will reduce moisture penetration. Shown with optional birdscreen.

SIDEWALL PROPELLER FAN ACCESSORIES & OPTIONS

Safety Guards are strongly recommended to protect personnel from accidental injury and to prevent debris from entering the fan. OSHA approved guards are required in many installations including when the fans are within 7 feet of the floor or work/access area.

Standard Duty Flat Wire Guard: The removable safety guard satisfies OSHA requirements when used with the optional wall housing as a motorside (rear) guard. The 16 ga. 1/2" X 1" welded wire mesh is mounted in a galvanized frame and attaches to the inward flanges of the wall housing.

Heavy-Duty Flat Wire Guard: The removable safety guard satisfies OSHA requirements when used with the optional wall housing as a motorside (rear) guard. The H.D. expanded aluminum mesh is mounted in a galvanized frame and attaches to the inward flanges of the wall housing.

Sheet Metal and Wire Motorside Guard: The OSHA approved safety guard consists of galvanized sides (aluminum optional) plus a flat wire guard (standard duty or heavy-duty) factory assembled and attached to motorside (rear) of the fan panel. This guard is **not** compatible with the wall housing or wall mounting collar.

Electric Damper Operators provide more positive open and closed damper positions which helps increase weather resistance. Power open - spring close (POSC) motor and linkage kits are field installed (except for center pivot style) and are available in 24, 120/240, or 460 volts (single phase) and require approximately 0.5 amps at 120/1/60 power supply. Transformers are available for voltage reduction. For fan motors 5HP and larger, we recommend a factory tilt switch or "delay-on" timer in the control circuit (by others) to allow the damper to open prior to allowing fan operation, which will protect the damper blades and fan from damage when the fan is first energized.

Electrical Accessories are available to simplify the installation and reduce the total project cost.

Disconnect Switches can be shipped loose or factory mounted and wired (except explosion proof and two speed) in NEMA 1, 3R, 4X, or other enclosures. Two-speed and explosion proof disconnects are available but may be subject to more stringent code requirements. It is the responsibility of the buyer and the installer to comply with all local and national codes.

Aluminum Construction is available for most models and typically includes propeller blades, fan panel, motor and drive support (large frame motors may have steel reinforcement) and accessories. When an explosion proof motor is specified, aluminum fan construction must be used for additional spark resistance.

cULus 705 or UL 705 Listing is available for sidewall propeller fans with most motors and should be specified for electrical safety and reliability.

Extended Lube Lines provide convenient access for routine bearing lubrication. Lubrication lines are installed from the fan shaft bearings to the exterior of the wall housing or sheet metal motorside guard and are provided with zerk fittings.

Paints and Coatings include protective and corrosion resistant coatings such as air-dry two part epoxy, phenolic (Heresite) and synthetic resin (Eisenheiss), as well as decorative color finishes to match the building (a paint chip is required to match). Please note that our standard construction material specifications are almost exclusively G90 galvanized steel and may not require any additional coating.

Mounting Angles facilitate the installation and a secure attachment of the wall housing or wall collar into the framed wall opening. Galvanized or aluminum angles are available and are pre-cut to the proper length. Additional bracing, mounting hardware, flashing and caulking are typically provided by the installer.

Factory Wiring can simplify jobsite installation and reduce the overall project cost. Optional services include wiring of motor, disconnect switch, damper actuator, and other custom controls. Please note that some wiring options may not be available in conjunction with the cULus 705 and UL 705 listing option (for example explosion proof, two speed and special motors).
